

OSHA Regulation 29 CFR 1910.1030

We Can Help!

CHECK THESE BLADES OUT!

We have two great new Safety Scalpels in both #22 and #60 blade sizes. Both have a one-handed, easy to use, 'slide and click' protective sheath that covers the blade reducing the risk of an exposure incident.

Are You Aware:

In response to the Needlestick Safety and Prevention Act of 2001, OSHA revised this standard by **clarifying the need to select safer needle and sharps devices and to involve employees in identifying and choosing these devices.**

Here's a few interesting facts from the Regulations:

- 1) It requires employers to review and update their Exposure Control Plan (ECP) at least annually.
- 2) **Employers document annually their consideration and implementation of appropriate commercially available and effective safer medical devices.**
- 3) **Devices must be selected based on employee feedback.**

DON'T FIGHT THE REG., HERE'S AN EASY WAY TO BE IN COMPLIANCE!

GIVE US A CALL and we will send you a **FREE SAMPLE** of both #22 & #60 for you to evaluate and try. It keeps you in touch with the latest available devices and is one step in keeping your lab in compliance!

- NO COST TO YOU!**
- 1 annual obligation done for the lab...9,999 to go!**
- Find a Safer Blade**

I'd rather watch paint dry on walls, then to read this!

I'm getting sleepy....
